Innovative Skills in the
Textile Sector

Welcome to the 4th Newsletter Technical Meeting

The 4th technical meeting took place in Iasi, at Faculty of Textiles, Leather and Industrial Management, Romania, on 6 of June 2019. The Consortium presented the work done in the first part of the project period and outlined the next steps.

There were discussed the following issues:

- Overview of the implementation process and follow up of the Quality Plan and the Dissemination Plan
- Project implementation and financial issues
- Project Intellectual Output 4
- Project Intellectual Output 5: Presentation of the progress on the development of IO5.

The Lead Partner of the project presented the implementation process, quality plan and financial issues.

The RTU and TUIASI partners presented the framework and learning materials of the IO4,

The IO4 objective is to develop a training toolkit, comprised of E-Courses based for a new qualification/ occupation, a new profile "Sustainable Expert" The goal of the Training Toolkit is to define, organise, implement and evaluate all necessary actions for developing a new training program in order to meet the training needs of the new occupation and qualification. There were discussed the framework of the modules which will be posted on a Digital Training platform in order to offer access to any learner to study by her/ himself the uploaded materials.

There discussed the following module:

- Sustainability Management-presented by RTU
- Environmental Performance- presented by RTU
- Corporate Social Responsibility-presented by TUIASI
- Circular Economy-presented by TUIASI

During the meeting, the framework and the content of the learning materials were carefully analysed and discussed. The final stage of all these materials will be posted on the Digital Platform of the Project. All the participants agreed on the idea that learning materials must be understandable, easy to access, download and study for any learner who has to self-training and gain new competencies, skills and knowledge. Despite the multidisciplinary nature of the Training Units, it will still allow each user to select the specific area or field wishes to focus on most.

CITEVE partner presented the progress on the development of Training Web Platform (IO5).

NEXT STEPS!

The training toolkit will be available in a Digital Platform, and the users could follow the modules corresponding the learning paths and build their self-customised learning paths in order to fill in their skill and knowledge gaps.

The courses will be translated in all partner languages.

Each partner will be responsible for the translation of the training toolkit in each national language.

The users will have the possibility to download the manual of the ECO-TEX Web Platform to be able to use it as best as it is possible.

The next phase of the project is to test the digital platform in order to evaluate it is friendliness, the satisfaction level regarding the content of the curricula, regarding skills and knowledge gained (expectations vs reality) and if there is something necessary to improve or change.
